

1 WATT WIRELESS RF TRANSMITTERS

A trusted name in the timing business since 1969, Pyramid is known for its expertly engineered clocks and time and attendance solutions for businesses of all sizes and from a variety of industries. Pyramid has developed a full line of synchronized wireless system clocks and transmitters that can be set up quickly and easily.

The proven industry standard 915MHz radio frequency transmitter delivers a dependable wireless synchronized clock signal in almost any vertical market. It is ideally suited for standalone corporate/industrial buildings, healthcare locations, K-12 school systems, or facility renovation, retrofit design, and new construction applications. Since the clocks receive their radio time frequency from a **Pyramid TimeTrax Sync Transmitter**, they will stay on time virtually anywhere throughout your facility. With the central time source being captured from GPS, NTP and/or the facility's internal network, it makes for a universal system almost anywhere.

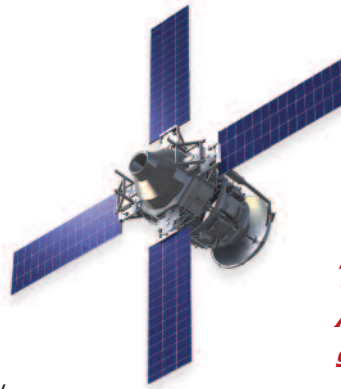

The Pyramid Wireless RF Transmitter can interface with a full line of Pyramid Time and Attendance payroll management systems. In addition, the transmitter can synchronize your networked servers, networked PCs, and most newer wired synchronized clock systems. Easy implementation with no FCC license required.

- Low-cost solution for corporate settings, schools, healthcare, or standalone industrial buildings
- Transmits wireless RF synchronization signal every 20 seconds to Pyramid's Wireless Clocks
- 128 channel 902–928MHz frequency-hopping technology
- Steel construction, microprocessor-based with no fans
- 5-year manufacturer's limited warranty

Pyramid
Time Keeping Made Simple

Pyramid TimeTraxsync

**TimeTrax Sync . . .
A totally integrated
solution from one
manufacturer.**

1 Watt Wireless RF Transmitters

- 128 channel 902–928MHz frequency-hopping technology
- 1 watt output power
- Transmits wireless RF synchronization signal every 20 seconds to Pyramid's Wireless Clocks
- Send RF time signal to an unlimited number of clocks
- Field interfacing with most newer clock and sound systems
- Internal clock and LCD display for clear and accurate readout
- Microprocessor based
- 5" box top antenna – No external antenna required
- Time source captured from GPS, NTP and/or internal Network
- Can serve as an NTP time source
- Sturdy steel case housing
- Battery back up for maintenance-free use should power fail
- Made in the USA

**Completely manage
your facility's time.**

*Sync transmitter time to these
other wired networked items.*

Warranty:

5-year manufacturer's limited warranty with free product replacement.

Specifications:

- Item Weight: 4.3 lbs. (1.950kg)
- Item Dimensions: 2.5" H x 14" W x 8.25" D
(6.35 cm x 35.56 cm x 20.95 cm)
- Required Voltage: Universal 50/60Hz 100-240VAC
- UL Listed Power Supply
